

Pinellas County Aquatic Preserve

SEACAR Discrete Water Quality Analysis

Last compiled on 26 June, 2024

Contents

Parameters	2
Dissolved Oxygen	3
Dissolved Oxygen Saturation	4
pH	5
Salinity	6
Turbidity	7
Water Temperature	8
CWBF1	8

Parameters

Dissolved Oxygen

[1] “There are no monitoring locations that qualify.”

Dissolved Oxygen Saturation

[1] “There are no monitoring locations that qualify.”

pH

[1] “There are no monitoring locations that qualify.”

Salinity

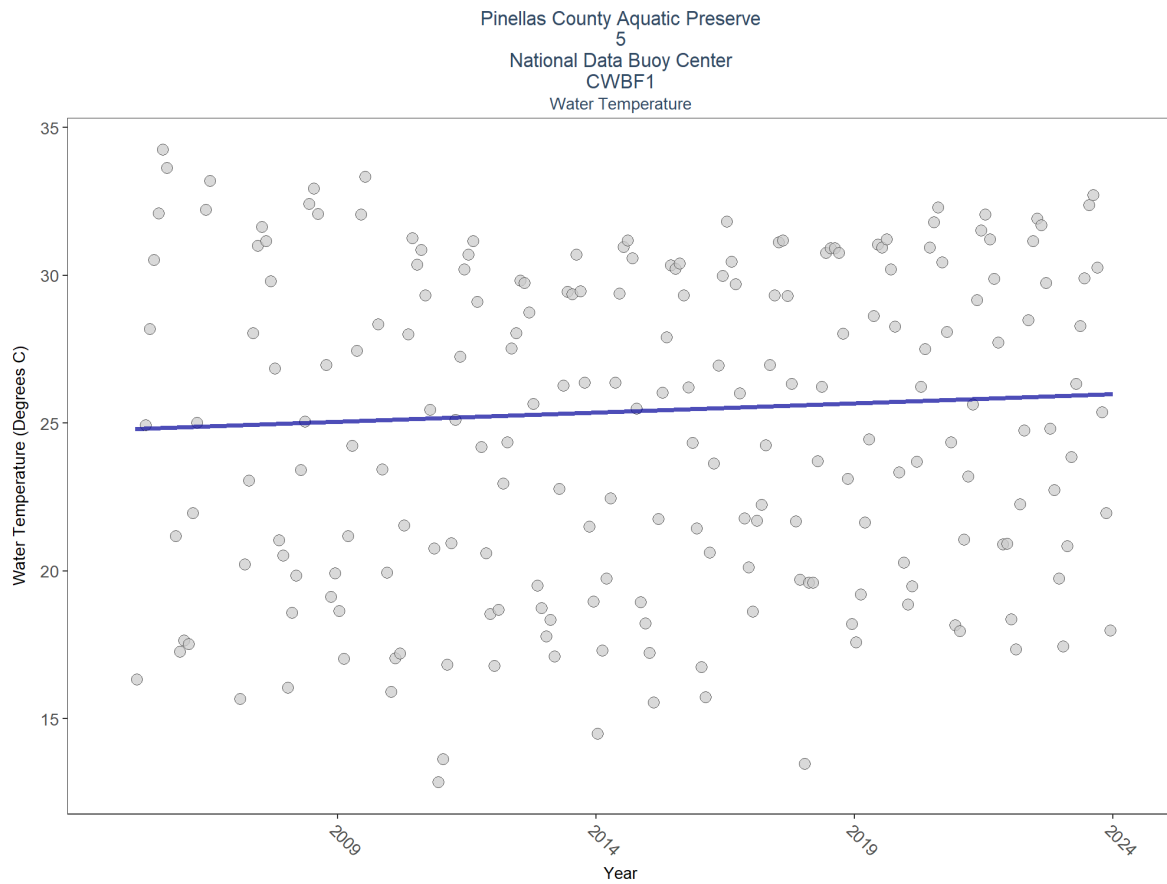

[1] “There are no monitoring locations that qualify.”

Turbidity

[1] “There are no monitoring locations that qualify.”

Water Temperature

CWBF1

RelativeDepth	N_Data	N_Years	Median	Independent	tau	p	SennSlope	SennIntercept	ChiSquared	pChiSquared	Trend
surface	1333301	19	25.3	TRUE	0.1689	0.0008	0.06281647	24.79948	9.8547	0.5435	1

$p < 0.00005$ appear as 0 due to rounding.

SennIntercept is intercept value at beginning of
record for monitoring location
